

## SOLID PAPILLARY CARCINOMA, BREAST

DESCRIPTION: Breast cores show an infiltrative tumor grade 2 (T<sub>3</sub>P<sub>2</sub>M<sub>1</sub>). The tumor is composed of solid proliferation of cells surrounded by a complex network of fibrovascular cores and focal areas of perivascular pseudorosetting. No lymphovascular invasion or calcifications seen.

DIAGNOSIS: Papillary lesion of breast, favour  
solid papillary carcinoma

### ADDITIONAL WORKUP;

IHC	MYOEPITHELIAL CELLS		NEURO ENDOCRINE MARKERS
	INTRALESIONAL	PERIPHERAL	
Solid Papillary Carcinoma	-	variable	variable
Encysted Papillary CA	-	-	-
Papillary DCIS	-	+	-
Papilloma with epithelial hyperplasia	+	+	-

ER, PR and Her-2 will also be performed (ER+, Her2-)

- (2) Discuss at MDT  
(3) Surgical excision is associated with favourable prognosis.
